# Timeline for Linking a Case of *Listeria* Infection to an Outbreak

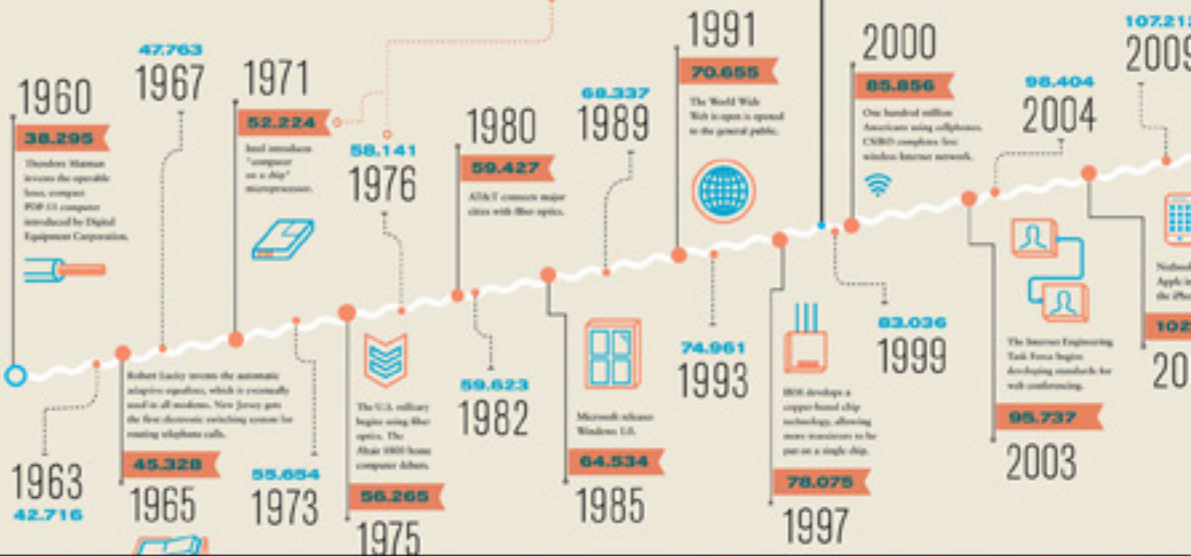

\*Not all states require clinical laboratories to forward *Listeria* isolates to public health laboratories, so some isolates are not sent.

**TECHNOLOGY** has many benefits, one of which is to make us more efficient workers. And throughout the 20th and 21st centuries, productivity has increased as technology has made it easier for us to work faster and connect with our fellow workers. This is a look at the United States's labor force's productivity—as expressed by a measurement of the output of workers as determined the U.S. government—and the technological advancements that have occurred during its growth.

PRODUCTIVITY IS MEASURED IN THE UNIT OF OUTPUT PER HOUR. OUTPUT PER HOUR IS A RATE THAT IS CALCULATED BY COMPARING THE VALUE OF ALL THE GOODS, GOODS AND SERVICES PRODUCED IN THE COUNTRY TO THE VALUE OF ALL RESOURCES USED TO PRODUCE THOSE GOODS AND SERVICES. WHEN WE USE FEWER RESOURCES TO PRODUCE MORE THINGS, OUTPUT PER HOUR GOES UP.

# PRODUCTIVITY

**February 2006**  
Michael Dell asks  
Why don't we reach out and help bloggers with tech support issues?

**December 2006**  
Ratings and reviews launched on Dell.com
